(54) CONTROLLER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a controller allowing an operator to freely operate the screen of a personal computer or the like while being seated comfortably on the rear seat of a passenger car.

SOLUTION: A mouse type controller 3 is provided on the armrest 2 of the rear seat of the passenger car 1. A mouse type operation section 4 for operating a joystick is provided on the head section of the joystick of a controller body. The mouse type operation section 4 can be fitted or removed, and it is provided with two buttons and a scroll wheel. A pointer on a screen is moved according to the position of the joystick. When the left button of a mouse is clicked with the pointer stopped at an aimed position, its icon is selected. The same actions as the normal mouse such as dragging can be made. The mouse type operation section 4 houses a microphone and a speaker, and it can be used as the wireless handset of a telephone.
